

VEGOUT'S REALLY ROUGH GUIDE TO PLANTING

The following list is a very rough guide to the planting of flower and vegetable seeds and seedlings at the patch. Any such list must not be considered as being definitive as:

- flowers and vegetables love to make a mockery of specific time lines; and
- it cannot claim to incorporate every species of flower and vegetable suitable for this area (as, for example, herbs and native plants are not included).

It is intended that this guide will be added to over time so, if you have any information that you think should be included, please pass it on to Mark Rasmussen or Barrie Richardson.
